### Purl Stitch (for double knit break down)

The process involves the method of weaving and hooking the pegs to be purred. For every purl stitch, lay the yarn below the existing loop on that particular peg. See dark blue yarn in picture. (Note: Photos have only one round completed. Wrap around loom again so that all pegs have 2 loops, then begin the purl stitches.)

## Luxe Cowl

In other words, you are placing the new loop between the original loop and the loom base. You may need to use your knit hook to lift the original loop up so new loop can be placed on loom.

Hooking the purl stitch: Insert the hook into original loop from top. Catch the lower loop (new loop) and lift up thru the original loop and off the loom. Let your other hand assist to push the original loop off. Now, place the new loop that is on the hook, back onto the peg.

Work purl stitches on outer loom only, not inner loom. Front side only will have purl round. Work each of the purl stitches before completing the round.

### FINISHING

Bind off loosely with crochet bind off. Move the inner loops to outer loom so that there are two loops on all pegs on outer loom. Lift lower loop over top so that only one loop remains on all pegs of outer loom. Inner loom is empty. Crochet off all pegs for a full round.

Be sure to bind off at anchor yarn; knot last loop and weave in all yarn tails.

Your pretty Luxe Cowl is complete.
