TIPS FOR USING THE FLEXEE LOOM FOR A BLANKET

The full loom can be laid out across your lap and only rotating the loom and links as each stitch is worked.

This prevents any awkwardness in holding the loom.

When using a large number of links, always fold up the loom before lifting using the entire hand around the loom. Especially when the work gets heavy.

Note: Knitting blankets with the Flexee Loom has a big visual advantage... you can see all of your work before the knit comes off of the loom and you can measure more accurately. Just unlink between the ends and lay the work out on a flat surface. The loom will adjust itself to allow for the tension as seen in this picture.
